

ABSTRACT OF THE DISCLOSURE

5 An infant accessory system and method of making the same
for providing an array of necessary infant care items. The infant
accessory system and method of making the same includes a base
layer, an intermediate layer, and a top layer. The base layer
includes a plurality of diapers rolled to form a cylindrical base.
10 The base layer includes a first diameter. The intermediate layer
includes a second diameter less than the first diameter. The
intermediate layer includes a second plurality of diapers rolled to
form a cylindrical intermediate stage. The intermediate layer is
positioned on top of the base layer. The top layer includes a third
15 diameter less than the second diameter. The top layer includes a
third plurality of diapers rolled to form a cylindrical top layer. The
top layer is positioned on top of the intermediate layer.
